Task 1: Installing Docker Engine

1a.jpg

A terminal window with a dark background and light text. The window title is '~ / P / 6 / C / L / t / task1'. The prompt is 'yoyo@zaemon'. The user enters 'sudo docker run hello-world'. The terminal shows the password prompt, the 'Hello from Docker!' message, and a list of four steps explaining the process. It then shows the command '\$ docker run -it ubuntu bash' and some Docker-related links. The prompt returns to 'yoyo@zaemon' with a cursor.

```
yoyo@zaemon in ~/PESU/6th Sem/CC/LAB - 2/tasks/task1 took 2ms
λ sudo docker run hello-world
[sudo] password for yoyo:

Hello from Docker!
This message shows that your installation appears to be working correctly.

To generate this message, Docker took the following steps:
1. The Docker client contacted the Docker daemon.
2. The Docker daemon pulled the "hello-world" image from the Docker Hub.
   (amd64)
3. The Docker daemon created a new container from that image which runs the
   executable that produces the output you are currently reading.
4. The Docker daemon streamed that output to the Docker client, which sent it
   to your terminal.

To try something more ambitious, you can run an Ubuntu container with:
$ docker run -it ubuntu bash

Share images, automate workflows, and more with a free Docker ID:
https://hub.docker.com/

For more examples and ideas, visit:
https://docs.docker.com/get-started/
